

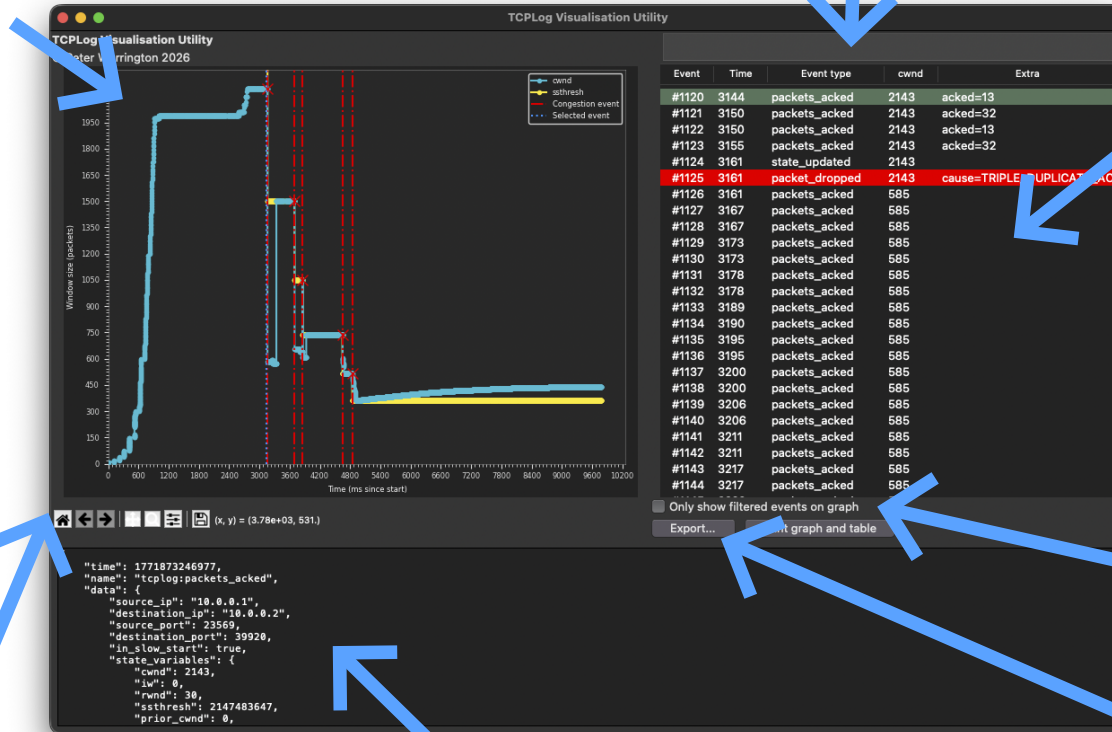

Graph view
Shows the Congestion Window and Slow Start Threshold for the duration of the connection.

Clicking on the graph selects events while also selecting it in the event list.

Filter textbox
Filter event list on event JSON keywords, and `port/source\_port/destination\_port/source\_ip/destination\_ip=<value>` terms.

Event list

Displays the complete list of events in the log.

Selected event is highlighted with the OS default colour.

Packet loss events are highlighted in red.

Selecting an event in the list also selects it on the graph.

"Only show filtered events on graph" checkbox

Export buttons

Graph controls

Home - Resets to the default zoom setting showing the entire connection.

Arrows - Go to the previous/next zoom setting.

Crosshair - Span around the graph while zoomed

Magnifier - Draw a selection on the graph on which to zoom.

Options - Set graph display settings.

Save - Export the current graph view to file.

JSON event display

Shows the raw JSON from the log file for the currently selected event.
